One Module Fits All

When ordering any Gridpro® wiring accessories,
please specify the required finish by following
the simple code structure as demonstrated here.

Clipping feature

Allows easy
removal and
assembly.

**Ergonomic front
mounting module**

Large radius
corners, allowing
easy assembly.

**Screw attachment
feature**

No Yoke needed for
assembly.

Scolmore®
G R O U P

No Yoke Needed

The GridPro® modules are secured to the back
of the 1 - 4 Gang GridPro® Frontplates via the
screw feature on the modules. The benefit of
not using a Yoke is that it allows the installer
to use standard Back Boxes!

**Screw directly on to the back of
1 - 4 Gang GridPro® Frontplates!**

For use with 1 - 4 Gang GridPro® Frontplates*...

*excluding the screwless Definity™ GridPro® Frontplates,
which have their own dedicated inserts.

STANDARD BACK BOX

SCREW-IN MODULES

NO YOKE

Works with Standard BS4662 Back Boxes

A unique feature of GridPro® 1 - 4 gang
Frontplates is that any British Standard
BS4662 flush mounted Back Boxes can be
used. This is because our 1 - 4 gang GridPro®
Frontplates do not require a Yoke!
