

PANEL HEATERS

Our PH PLUS panel heaters herald a new dawn in electric heating with a traditional product benefiting from the very latest technologies to provide a modern, efficient and controllable direct acting heater.

Our wall mounted panel heaters are the perfect choice for a cost effective and rapid solution to heating a room occasionally or for short periods of time during the day.

These panel heaters are the desired solution for home owners and designers alike, taking up little space and quickly reaching an even and comfortable temperature.

As well as being used as an independent heating system, they are also used to complement other electric heating systems such as storage heaters and are ideal for use in rooms such as bedrooms, bathrooms, kitchens and other areas where constant heating is not required.

With the PH PLUS range of panel heaters, the temperature can be accurately controlled via the built-in digital thermostat that boasts an industry leading accuracy of $\pm 0.1^{\circ}\text{C}$.

Available in 4 different outputs - 750w, 1250w, 1500w and 2000w, this superb range of heaters are equipped with efficient features such as daily and weekly digital programmer, highly accurate thermostat, three temperature modes, open window detection for reduced energy waste, adaptive start control to guarantee maximum comfort at the desired time and a 5 year memory back-up security system.
