

Unlike fixed head microwave detectors the MWS3A offers a unique presence/absence detection capability by using an adjustable head.

This incorporates an innovative locking mechanism to prevent tampering. By changing the angle of the head, different detection patterns can be achieved to suit the application. An integral sensitivity adjustment allows the detector to be fine tuned to its environment. The detector is self contained and can be flush or surface mounted using a separate detector back box.

Key Product Features

Unique adjustable head design Locking mechanism to prevent tampering Can be flush or surface mounted

Switching Detectors

PRM version functionality	PRM ()
Switching with lux level sensing (IR handset adjustment)	
Active photocell	
Time delay function	
Presence detection switching	
Absence detection switching	
Programmable via IR handset	
Adjustable detection sensitivity	
On/off override via optional IR handset	
Manual on/off override via switch input	

Dimming Detectors

DD and AD version functionality (in addition to PRM)
Dimming functionality
Two channel flexibility
Step-down illuminance
Maintained illuminance (daylight harvesting)
Burn in feature for fluorescent tubes
Control of DALI, DSI or 1–10V loads depending on product
Integral relay to reduce parasitic power
Suitable for all lighting types
Manual dimming with IR
Manual dimming with switch inputs

Selected switching detectors are available with the following options

Low voltage 12–24V AC/DC Voltage free contact 2 channel 2 channel normally closed for fail-safe applications Contact our sales office for the variants available
