CCS 32mm White Dual Gang	012-007-002-321

Connectix Standard Faceplates are available in compact depth, single and dual gang versions, and have been designed to fit all industry standard modules.

All Connectix faceplates are supplied with fixing screws and come finished as standard in an attractive high gloss white. Grey faceplates are also available if a high contrast is required between the mounting surface and the outlet (as specified in the Disability Discrimination Act).

Connectix backboxes are available in single and dual gang with a choice of surface mounted and flush mounted dry lined wall versions. Surface mount boxes feature knock outs for mini trunking adaptors.

Dry lining wall boxes are suitable for mounting into 6-14 mm thick board and can easily cope with irregular shaped aperture sizes. Swivelling snap out clamps will grip any standard thickness of building board tightly.

DDA faceplates
