PLEASE READ THESE INSTRUCTIONS BEFORE INSTALLATION.

WARNING: Risk of electric shock! Isolate the mains power before proceeding.

- Turn off the mains power before performing inspections, installation, or removal
- Verify that the supply voltage is correct by comparing it with the luminaire label information
- It is the installers responsibility to ensure installation is suitable for the total load of the luminaire(s). The supply cable, fuses/circuit breakers must be correctly rated for the electrical load and considering for any transient inrush currents that may occur
- Do not perform insulation strength or resistance tests on installed luminaire(s) connected

1. Isolate the circuit.
2. Drill 75-80mm hole cut out.
3. Strip cable sleeves to reveal 10mm wire. Push wires into connector and push clamps downwards to secure the wires.
4. Attach connector to other half on light fitting.
5. Select CCT option and Wattage option by moving switch across to desired setting.
6. Grip spring clamps and move vertically. Insert downlight into pre-drilled hole and clamps will spring back and secure light fitting. Repeat for any other downlights, then connect power on.
